OTHER PRODUCTS

SWIFT

Independent Emergency Communication

Multiple Emergency Applications are made available using a virtualized network server. Multi-technology Communications Use mobile radio, video and data feeds, even IP telephony and messaging between different responding agencies.

eReach

Emergency Base Station

A portable, plug and play emergency cellular base station that runs on large battery power. eReach can be activated in less than 30 minutes. Once online, the system will detect all active SIMs within its coverage area and will assign a temporary number to get the communications up and running.

eReachICC

Portable Command Center

eReach ICC is a portable incident command center that can house multiple applications that can aid the on-ground operations within a specific area or locality.Applications can include network management, emergency applications, environmental monitoring and/or unit dispatch software.

ReachNet

Private LTE Networks

ReachNet Private LTE Networks allow organizations to customize their networks for mission-critical applications. The network can be optimized to support applications that require low latency and independence from the public wireless spectrum.

THE ADVANCED DISPATCH SYSTEM

SWIFT DISPATCH

SWIFT is a complete, standalone and easy-to-use dispatch system that gives call takers and responders the power and tools necessary to make intelligent and automated decisions.

SWIFT DISPATCH CENTRE

The Dispatch Centre manages all updates from their own devices such as live vehicle location, new call details, call notes, onsite photos, personnel status and units status. Responders can also get in touch with the Dispatch Centre via IP telephony and/or video conferencing.

SWIFT CALL TAKING

Full featured Computer Aided Dispatch (CAD) allowing call takers to manage resources such as units and personnel with complete view of the system

INCIDENT MANAGEMENT

Swift Call Taking can be customized to meet the current and future call handling field questions & requirements.

ADVANCED DISPATCH

Call takers can easily assign calls to responders to respond based on the unit proximity and availability

STREAMLINED OPERATIONS

System can help streamline operations within all the connected agencies and responders

FASTER RESPONSE TIME

Dispatchers and responders are automatically alerted with incident location and details

SWIFT RESPONDER

The Responder App allows responders to have updates from their own devices such as live vehicle location, new call details, call notes, onsite photos, personnel status and units status. Responders can also get in touch with the Dispatch Centre via IP telephony and/or video conferencing. Responders can also submit ICS Forms for easy filing.
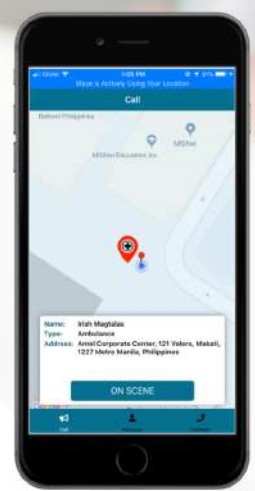

SWIFT CITIZEN ALERT

The Citizen Alert App allows users to request for specific units and provide vital information and photos depending on the emergency type. Users can also communicate directly with the dispatch center with vital information. Users can also view the status and location of assigned rescue units.
